

Additional 10 Space operators have joined the Flux Team

Asnaes, Denmark May 2007

6 more space operators were employed in May to meet the increasing demand for Flux A/S space components. Totally 10 operators have been employed in 2007. More will follow.

The increasing sale of components for space applications makes Flux A/S to invest in new operators and facilities.

Since the beginning of 2007, 10 new operators have been employed and are now under training and certification. Additional 6 have been assigned to start in August 2007.

The significant growth has also resulted in a doubling of the area used for manufacturing of Space components.
